Amendment

JUL 02 1999

TECHNOLOGY CENTER 3700

Sir:

In response to the Official Officer Action dated June
6, 1999, in the above referenced application, please amend
as follows:

IN THE CLAIMS

1. (Amended) A device for reducing the discomfort in the mouth of
a human patient, said discomfort being created by the adjustment of
an orthodontic appliance fitted to the patient's teeth comprising:
a housing, said housing containing a motor driven vibrating
unit and a self contained power supply for operating said motor;
activating means for interconnecting said motor driven
